

Bengle, the new model from Decent Espresso

Coming in 2025. Priced at USD\$6000.

Everything we learned in 8 years of building the DE1, applied to make our ultimate espresso machine.

Best for smelling espresso.

The unique asymmetrical shape opens up to let your nose enter the cup as you sip. This greatly increases what you can smell from your drink, compared to an open-shaped glass.

Very thin walls, matte outer finish, reminiscent of the best of Japanese ceramics. The inside of the cup is glossy.

⊕ ADD: \$14

Best for flat white, medium latte, Americano.

The unique asymmetrical shape lets you pour latte art early during your milk pour, letting you get the milk jug easily close to the milk. Very thin walls barely cool the milk, allowing you to heat it less, preserving sweetness. Matte outer finish, reminiscent of the best of Japanese ceramics. The inside of the cup is glossy.

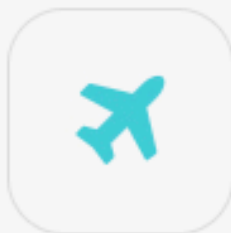

☒ QUANTITY: 3 X \$16

Best for large lattes, filter coffee and large Americanos.

The unique asymmetrical shape lets you pour latte art early during your milk pour, letting you get the milk jug easily close to the milk. Very thin walls barely cool the milk, allowing you to heat it less, preserving sweetness. Matte outer finish, reminiscent of the best of Japanese ceramics. The inside of the cup is glossy.

celine [close]	Peter Crawbuck	Decent Espresso Engineering Application Hello, My name is Peter Crawbuck and I am reaching out for the opportunity to join the Decent Espresso Team. I am a mechanical engineer, incredibly interested in the science of espresso brewing and I dream of building a career based on these two passions. I have attached a resume and cover letter with all my information. I hope to speak to you soon. Thank you, Peter Crawbuck See attached file: https://decentespresso.com/f/160499/Peter%20Crawbuck%20Decent%20Espresso%20Resume%20and%20Cover%20Letter.pdf - July 8, 2025

mirjam [close]	Greg Klingsporn Need replacement grouphead touch panel Hello. This morning I stupidly dropped a cup onto my machine GHC and slightly chipped the edges of the glass (see picture). It still functions, but I think I would like to replace it (unless you recommend otherwise). Can you let me know the correct part(s) to order? Also, it looks from a quick search of the Diaspora that this is something that I can replace myself with some care, do you agree? Thank you very much, /Greg See attached file: https://decentespresso.com/f/13033/IMG_2628.HEIC - July 8, 2025

mirjam [close]	Tom Collier Half Decent Scale What's up? This morning I see messages coming through Basecamp from folks getting their half-scale and looking for instructions, yet when I go to the web site it says "coming soon"? Nick P. posted Half decent scale instructions Hi, Is there any instructions for the half decent scale? Ive just received mine and there are none included. No other options like a QR and just want to make sure I'm doing things as intended as does require some setup. Thank you - July 8, 2025
mirjam [close]	Jake Johnson Order 25585-93109 Cusoms Due? The waybill number is, 8569617000. I just received an email from DHL stating they paid the amount, but that I now need to pay them. Seems like it could be a scam, though it does state that the package is coming from Decent and the Waybill number matches the one from the DHL texts and emails. Any help is appreciated. - July 7, 2025
mirjam [close]	Choi minhyuk Order 28692-93134 Hello, I placed an order that includes an extended warranty and three accessories. The actual items being shipped are worth \$149, but since the warranty is included, the total invoice amount came out to \$449. However, this may cause issues with customs clearance due to the high declared value. Would it be possible to adjust the invoice amount for shipping purposes to reflect only the value of the physical goods, which is \$149? Thank you in advance for your understanding and support. Best regards, Min - July 7, 2025

Warm up the machine

1. Tap the Decent tablet screen to wake it up. It will say "Wait" and the espresso machine will go into a warmup mode. When it's finished, the screen will say "Ready."
2. Tap the **Settings** button in the lower-right corner of the tablet screen.
3. Tap the **Presets** tab on the **Settings** screen. The presets are a collection of brewing profiles. Choose the "Default" setting or the "Gentle and Sweet."
4. Tap **OK** to return to the Home Screen.

We recommend that you use the same coffee profile for about a week, with the same beans. This will give you a chance to "dial in" your espressos to your taste and reduce the number of variables.

The "Ready" button appears after the machine is warmed up.
